

John J. Graham MD MRCP(UK)
Interventional Cardiologist, St. Michael's Hospital

Biography

John Graham joined St. Michael's Hospital as an Interventional Cardiologist in 2008. He is a Clinician Investigator in the Division of Cardiology and is the Director of the Interventional Cardiology Fellowship Program and physician lead for the STEMI program at St. Michael's Hospital.

Dr. Graham obtained his medical degree (graduating *with Commendation*) from the University of Glasgow, Scotland in 1995 and completed postgraduate training in Internal Medicine and Cardiology at Royal Brompton, St. Bartholomew's and London Chest Hospitals in London, England. In 2005, he undertook a combined research/clinical fellowship in coronary intervention and cardiac MRI at the University of Toronto/Sunnybrook Health Sciences Centre.

Dr. Graham's clinical interests include radial access PCI, PCI of chronically occluded arteries (CTOs) and treatment of calcified lesions. His research interests are in the field of complex coronary angioplasty (particularly coronary CTOs, calcified arteries and mechanical circulatory support), Spontaneous Coronary Artery Dissection (SCAD) and renal denervation therapy for resistant hypertension.

Dr. Graham is married with 3 children and often goes to work for a rest. Socially he is an avid soccer (but he calls it football) fan, a moderate skier and a slow cyclist.
